Free Readout — ISO 9001:2026 Gap Analysis Starter Pack

**Tar
2026)

The Three Biggest ISO 9001:2026 Gaps Most Organizations Haven't Addressed

ISO 9
trans
check

1. Climate Change Risk Assessment (Clause 6.1) — **NEW**

Your organizational context analysis ("what affects our QMS?") now **must include climate change** as a factor. Not as a suggestion. In the clause text.

2. Anti-Corruption Controls (Clause 5.1_new) — **NEW & HIGH IMPACT**

First-ever ISO management standard to include anti-bribery/fraud/integrity requirements within QMS scope.

3. Quality Culture as Measured Performance (Clauses 6.3 + 7.3) — **NEW / CHANGED**

"Quality culture" is now a named, measurable requirement — not just implied through leadership commitment (5.1) or awareness (7.3).

Self-Assessment Starter: Clauses 4 & Your First Gap
